1. How do I get to the Fresenius Learning Center?

The Fresenius Learning Center is available via the Fresenius Intranet or on any computer via the normal Internet. Open a web browser (Internet Explorer is recommended) and type in the following web address:

<https://learning.fresenius.com/fmc/cw>

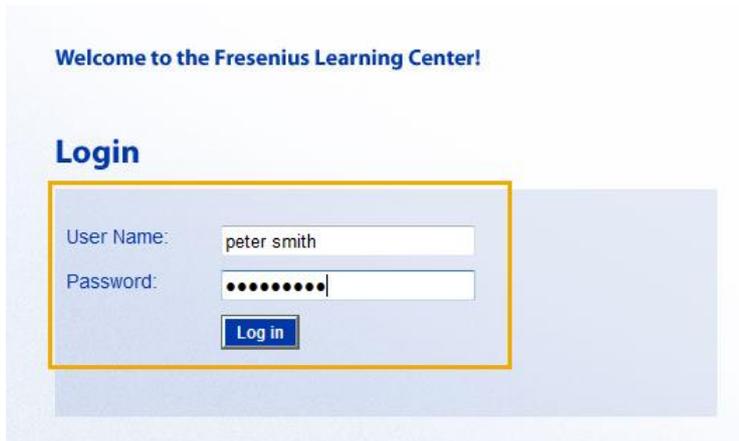

Please make sure you open the Fresenius Learning Center with a web browser and not within Lotus Notes as the internal browser does not support all the functions needed, which will lead to problems.

If you are using a non-Fresenius computer you can use the "PC Check" function at the bottom of the login screen to ensure the computer has all required software installed.

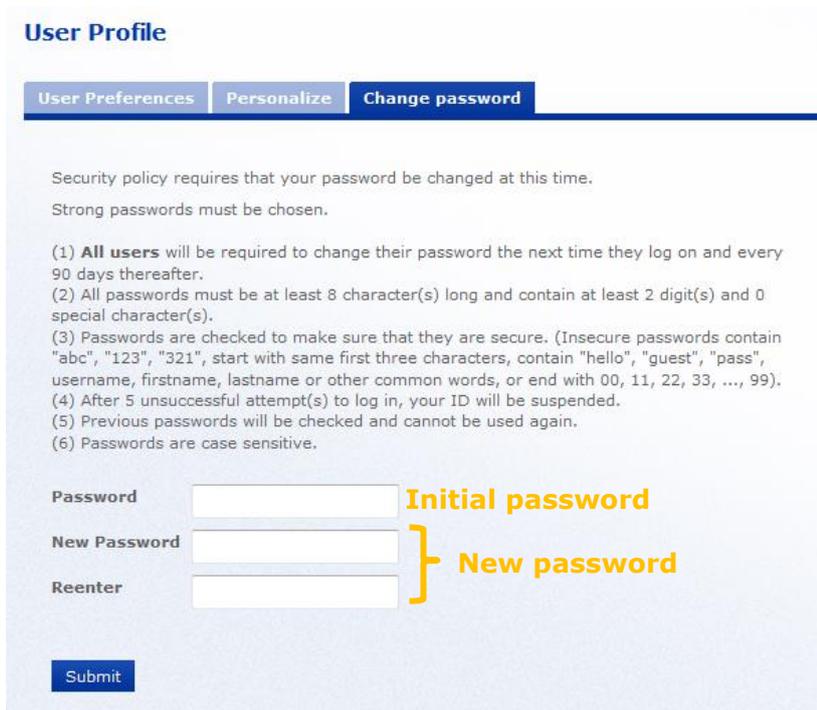

2. How do I login?

A user account for you has been set up. The login credentials have been sent to you by e-mail.

Enter your User Name and Password and click 'Log in'.

At the first login you will be asked to change your initial password. Type in the initial password (the one sent to you in the welcome e-mail) and then your new password twice. A strong password is required. Please see the guidance in the 'Change password' tab.

For security reasons the password needs to be changed every 90 days. Once your password has expired and you try to login, the 'Change Password' tab will automatically be shown.

3. What do I do if I can't remember my password?

If you have forgotten your password for the Fresenius Learning Center you can reset it yourself by clicking on the 'Reset Password' link at the bottom of the Login page.

Please also note that after 5 failed attempts to login, your account will be suspended, at which point you will only be able to regain access to your account by using the 'Reset Password' function or contacting your local administrator.

After clicking on the 'Reset Password' link you will be taken to the 'Reset user password' screen.

Please fill in either your E-mail address or your User ID but not both and click on 'Reset'.

Please note:

Only enter the e-mail address here if you have a personal Fresenius e-mail address. Do not use your private or clinic e-mail address.

Providing the system can identify you, an e-mail with a new password will then be sent to the e-mail address registered to your account. If you don't have a personal Fresenius e-mail address your e-mail will be forwarded to your direct appraiser or a group/clinic e-mail address.

If the system cannot identify you, you will be taken to another screen with a longer, more detailed form to complete. When you click 'Send' an e-mail will be sent to the local system administrators to manually identify you and reset your password. An e-mail will then be sent to your registered e-mail address with a new password.
